Chapter 2 by 20hupj

For the first time in the history of the FBI all of their information went down.

All of their data, notes and grand plans gone in the blink of an eye.

Everything the FBI had ever learned vanished by the click of a button.

It wasn't long before everyone heard about the news: one of the world's most guarded companies had been hacked. The headlines began to pour out everywhere:

Hacker steals classified information

Could this be the end of the FBI?

Police stormed the country investigating the attack, even going to the lengths of interviewing normal civilians. How could this be? Who could be smart enough to hack into the FBI?

I'd like to say it was a mistake, but it wasn't.

I did it just because I wanted to and sometimes a Sunday afternoon can get a bit boring.

My name is Ekaterina, a normal 12 year old Russian girl who is about to tell you the secrets of how to hack into the FBI.

Chapter 3 by Mason Lee

One click on the keyboard of the small laptop, and it all went down.

One click and I knew about things that had puzzled American conspirators for years, such as Area 51.

One.

Click.

I'm an experienced hacker. I'm one of the best hackers in all of Russia and the richest kid on the streets because of it.

But Ekaterina, you said you were normal!

I am. You'd be surprised how many Russian kids are homeless.

Even more are **детей-сирот**, orphans.

Like me.

Chapter 4 by Mason Lee

I scratch my name in the dirt of the alley I live in.

I had been so bored, and it was such a good challenge. The FBI have, like, 50 layers of encryptions and an excellent firewall. And now, a day later here I was, bored out of my mind.

That was when I saw the poster in both Russian and English.
